

CONTRACTORS SAFETY NOTICE

ASBESTOS

WARNING: This building may contain asbestos

These products are in many forms with different surface finishes that can hide the fact that asbestos is present. It is not a simple process to determine whether asbestos materials are present, and it is safer to assume that all materials contain asbestos unless you know for sure or it is proven otherwise that they do not.

Always be sure to check whether any asbestos is present, using the onsite asbestos register.

Before any work is carried out that may disturb unknown asbestos materials intrusive checks may be required including a Refurbishment and Demolition Survey.

Report discovery and/or damage to asbestos to:
E.Sienkiewicz- Acting Headteacher.....

FIRST AID

Your nearest First Aid Kit is located

SCHOOL OFFICE
